3M Fibrlok Splice Kit

Specialized Products Company offers you the flexibility to purchase preconfigured kits or customize your kit to include the case, test gear, tools, connectors, cleaning solutions and so much more for a total solution. This flexibility allows you to create a solution that perfectly meets your needs.

The SPC840 3M Fibrlok Splice Kit is a versatile and reliable solution for splicing optical fibers. It's designed for quick and secure splicing in field installations, offering an efficient method to restore or create fiber connections.

Key Components:

Fibrlok Splice Technology: The kit includes 3M's Fibrlok splices, which are known for their ease of use. These splices require no special tools or adhesives, making them ideal for quick, reliable splices.

Universal Fiber Compatibility: The kit is compatible with single-mode and multimode fibers, allowing for a wide range of applications in both data and telecommunications.

Simple, Tool-Free Installation: The splicing process is straightforward, with no need for epoxy, polishing, or curing. This results in reduced installation time and minimal training requirements.

Compact and Portable: The Fibrlok Splice Kit is designed to be portable, with a compact case that makes it easy to carry and use in the field.

High-Performance Splices: The Fibrlok splices are engineered to provide low insertion loss and high retention, ensuring long-term performance and reliability.

This kit is perfect for technicians who need a dependable, easy-to-use solution for fiber optic splicing, especially in situations where speed and efficiency are critical.
