

Fiber Inspection/Cleaning Kits

Want to solve over 80% of your fiber issues?

Statistics show over 80% of fibers in the network don't meet the manufacturer specifications for loss and/or reflections due to dirt and oil contamination. The simple resolution is Connector Inspection and Cleaning.

Specialized Products Company offers the EXFO FIP-500 Fiber Inspection Probe – an autonomous solution that is the fastest and first inspection probe in the industry for single-fiber, multi-fiber and duplex connectors yielding the most consistent and reliable results. Engage the “smart tips” for automated probe setup and configuration while realizing zero-button testing all day without the need to recharge batteries. Paired with Clean Supplies to remove dirt and debris from connectors, ensure your network is fully functioning and reliable the first time.

With Specialized Products Tool Kitting Program, we can create a custom kit including the EXFO FIP-500 Fiber Inspection Probe, adaptors and smart tips tailored to your needs.

FIP-500
Fiber Inspection Probe

Fiber Inspection Cleaning Kits Include:

- Single Fiber Connectors – Patchcord and Bulkhead tips for SC/UPC, SC/APC, LC/UPC, LC/APC, Universal 2.5mm, Universal 1.25mm
- MPO Connectors – up to 32 fiber connectors, APC, UPC, duplex or any combination
- Both – Single Fiber and MPO in any combination

Or create your own customer kit with a custom tip kit by adding a case and any additional tips you need!
