

Zamp Solar OBSIDIAN® SERIES Portable Kits

OBSIDIAN® SERIES 45-Watt Portable Kit- Unregulated

Part #: USP2002 Stock #: 930X150

Our OBSIDIAN® SERIES Portable Kit is the perfect on-the-go power solution to charge your next adventure. It features patented low-profile solar panels to provide the ultimate flexibility and durability in a mobile and off-grid solar charger. These Made in USA panels are handcrafted in Bend, Oregon using premium materials and precision manufacturing techniques to meet your off-grid power needs and exceed your expectations.

- 45-Watt portable panel is perfect for small power applications or adding power to existing RVs, Vans and over-the-cab truck campers.
- Weighs only 5.8 pounds but ample power to weight/size ratio.
- Provides updates on power usage in real-time and over long periods on large digital display.
- This kit is ideal to add to an existing portable kit or solar system that has an integrated charge controller in use. Unregulated portable kits do not include a charge controller. Do not tie an unregulated solar panel directly into a power system without the use of a charge controller.
- Zamp Portable Solar kits will plug into all RV industry standard factory installed side ports using available adapters if needed.

Low Profile & Lightweight

Perfect for tight storage spaces in vans and Overlanding trailers, remote job sites and locations and the ultimate versatility. The OBSIDIAN® SERIES portable kits are 50% lighter and 50% lower profile than our Legacy Series Portable Kits.

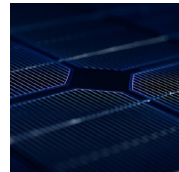

Instant on the go Power

Tactical carry case doubles as a quick deploy adjustable stand with slim aluminum carry handles and adjustable molded block feet.

Rugged Ease of Use

Reinforced storage bag that lays flat for maximum space will keep all accessories protected and organized with a clear weather-resistant window to monitor the charge controller.

Maximum Power and Durability

Anti-Reflective coating traps light for better performance and the tempered glass provides strength and longevity.

Kit Includes:

- Patented OBSIDIAN® SERIES 45-watt solar panel
- The tactical all-weather integrated carry case quickly deploys into an adjustable stand.
- Padded ballistic-nylon accessory pocket to house all cables, charge controller, and future upgrades.

- All-weather ATP plugs for customizable and scalable integration.
- 15-foot portable ATP-ATP extension cable
- 6" ATP-SAE Adaptor
- 25-Year Output Warranty

Single Kit Size: 32" tall x 15.5" wide x 2" thin

Single Kit Weight: 12 lbs (Note that weights does not include cables)

Improve versatility and functionality with these additional accessories available separately.
