

Punchdown Tool Extension

Economically priced!

Compatible with industry standard
blade socket design.

Patent Pending, SullStar Technologies, Inc.

Description

The Punchdown Tool Extension is designed to extend the reach of your punchdown tool. This greatly improves access and visibility when working in a recessed box or densely stacked cross connect block environment. Rugged, all steel, easy to use design. Gang two extensions together to double the length!

- Bayonet style (twist & lock) blade retention socket is compatible with most industry standard tools.
- Use in enclosures with stacked or layered modules.
- Use in tight/over-crowded work area.
- Use when the PD tool is an obstruction.
- Manufactured from tool steel for long life.
- Rust resistant black oxide coating.

Instructions

Insert extension into punchdown tool and turn, same as a punchdown blade. Insert punchdown blade into extension.

Extension tools may be stacked for additional reach.

Compatible with all Bayonet (twist & lock) style punchdown tools.
